The map displays the entire territory of the Municipality of Lamon, highlighting various environmental and planning constraints. The territory is bounded by the Province of Trento to the north and west, and the Province of Udine to the east. The map shows the following features:

- Vincolo Ambientale (Blue wavy lines):** These lines delineate areas of environmental constraint, primarily following the course of the Adige river and its tributaries, as well as along the borders of the municipality.
- Interesse Ambientale (Green wavy lines):** These lines indicate areas of environmental interest, often following the course of smaller streams and in specific mountainous areas.
- Zona SIC (Grey shaded areas):** These areas represent Sites of Community Interest, covering large portions of the mountainous terrain, particularly in the northern and eastern parts of the municipality.
- Rispetto Linea 220 KV (Hatched areas):** These areas indicate where the terrain must be managed to respect the 220 KV power lines.
- Linea 220 KV (Red lines):** These lines show the exact path of the high-voltage power lines across the territory.
- Topography and Land Use:** The map includes detailed topographic information, such as elevation contours, and land use patterns, showing a mix of agricultural land, forests, and built-up areas.
- Settlements and Infrastructure:** Numerous small settlements and hamlets are marked, along with the main road network and the railway line.
